EDUCATION

Indiana University

May 2026

Bachelor of Science in Computer Science — GPA: 3.7

Minor: Mathematics **Certificate:** Artificial Intelligence

Relevant Courses: Deep Learning, Artificial Intelligence, Data Structures & Algorithms, Software Engineering, Web Development, Database Systems, Python, Java, C++

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS, SQL, R

Frameworks & Tools: React, Spring Boot, Flask, Node.js, PostgreSQL, Pandas, NumPy, Scikit-learn, Git, Linux, OpenAI API, AWS

Technologies: REST APIs, OAuth2, Webhooks, API Integrations, CI/CD, Microservices, SaaS Applications, GitHub

PROJECTS

AI Workflow Automation Platform | Python · OpenAI API · PostgreSQL

Spring 2026

- ▶ Built an AI-powered platform that automated multi-step business processes using LLM-driven task orchestration and approval workflows, reducing manual effort by an estimated 70%.
- ▶ Designed and implemented REST APIs and backend services to manage users, workflow states, permissions, execution history, and tool integrations across multiple organizations.
- ▶ Integrated external services through API connectors with authentication, rate-limit handling, retry logic, and error recovery to ensure reliable workflow execution.
- ▶ Built observability features including execution logs, metrics, and audit trails, leveraging ChatGPT and GitHub Copilot to accelerate development and maintain code quality.

Real-Time Analytics Dashboard | Node.js · Express · PostgreSQL · JavaScript

Spring 2026

- ▶ Designed and developed a SaaS-style analytics platform that replaced spreadsheet-based reporting with interactive dashboards featuring real-time KPI tracking and business insights.
- ▶ Built backend APIs for data ingestion, aggregation, filtering, and export, enabling drill-down analysis and reporting across multiple datasets.
- ▶ Implemented role-based access controls and user management to support secure multi-tenant environments and protect sensitive business data.
- ▶ Optimized database queries and reporting workflows, reducing dashboard load times by 50%+ and delivering responsive visualizations that surfaced performance trends efficiently.

BIOS Configuration Tool Integration | PowerShell · Microsoft Graph API

Dec 2025

- ▶ Automated BIOS provisioning using custom PowerShell modules, standardizing device setup and cutting provisioning time by 60% while eliminating ~90% of manual configuration errors.
- ▶ Integrated Microsoft Intune with internal tooling via the Microsoft Graph API to enforce consistent BIOS policies across 100+ enterprise devices, reducing compliance verification time by 40%.
- ▶ Engineered resilient automation using idempotent operations, retry logic, and granular permission checks, reducing failed executions by 75% and significantly lowering support rework.
- ▶ Adopted Git-based workflows with structured branching and pull requests, improving code quality and enabling 2× faster delivery cycles across the team.

EXPERIENCE

Computer Science Teaching Assistant | Indiana University

Aug 2024 – Dec 2024

- ▶ Mentored 30+ students in web development through code reviews, Q&A sessions, and targeted guidance, contributing to a 25% improvement in project scores across the class.
- ▶ Increased grading efficiency by 40% by designing structured rubrics and delivering actionable feedback that helped students understand mistakes and improve future submissions.
